

Dear Public Servant:

You are hereby on notice regarding the enclosed information.

Do not ignore the information in this email.

First: The proposed amendments to the International Health Regulations that are currently being negotiated by the World Health Organization are specifically designed to override national sovereignty and would remove respect for the dignity, human rights and fundamental freedoms of all people.

Second: This is NOT a conspiracy theory. This is EVIDENCE:

Proposed Amendments to the International Health Regulations:

Proposed Pandemic Treaty:

Third: The following are excerpts from the official WHO IHRRC Final Report:

“The proposed amendments to these definitions could be understood as aiming to change the nature of these recommendations from non-binding to binding, and giving a binding effect to WHO recommendations and requests as proposed in other articles.” (page 26)

“This proposal also renders mandatory the temporary and standing recommendations addressed under Articles 15 and 16.” (page 55)

“The proposed amendment to include a reference to temporary and standing recommendations seems to make application of these recommendations obligatory.” (page 67)

“This Committee is concerned that these proposals may unduly impinge on the sovereignty of States Parties and give binding effects to what are supposed to be recommendations.” (page 68)

“The obligations set out in paragraph 1 of this proposed new Annex appear to be absolute and unconditional.” (page 89)

Fourth: The proposed amendments clearly threaten to REMOVE the following text from Article 3: *“full respect for the dignity, human rights and fundamental freedom of persons.”*

Fifth: The 75th World Health Assembly adopted amendments to 5 articles of the IHR that dramatically reduced the time that the 194 member nations will be allowed to reject future amendments. No signature from leaders nor approval by any Parliament or Senate was needed to enact those amendments into international law that is legally binding upon all nations. This happened in 2022 and it can clearly happen again.

Sixth: Both documents are designed to be “legally-binding.”
